

Tree Nursery Demo

Trial Design Select 20 tree nursery seedlings of similar developmental stage:
10 with NEB
10 without NEB

Application Instructions Apply NEB weekly as a foliar spray

NEB / Water Solution Foliar spray dilution rate: 5 ml NEB/10 L water (0.5 ml/L)

Dosage Spray until leaves dripping wet (run-off)

Fertilizer & Chemical Follow your normal fertilizer and pest protection program

Evaluation Recommendation Evaluate after 90 days. Evaluate both roots and foliage (carefully dig roots and wash with water)

Note: During Evaluation Larger root systems, larger leaves and advanced canopy growth. Healthier, more vigorous seedlings. Reduced growth time in nursery, until seedlings are ready to transplant in the field.

Tree Nursery 90 Day Demonstration
